

FIGUEROA VETERINARY SERVICES

Standard Operating Procedure: Suckler Cattle Vaccination Protocol

Prepared by: Craig Figueroa MRCVS

Last Updated: October 2026

1. Calf Pneumonia (Bovipast RSP):

- First Dose: 5ml subcutaneous injection, from 2 weeks of age.
- Second Dose: 5ml subcutaneous injection, 4 weeks after first dose.
- Booster: Annually, 2 weeks before autumn housing.

2. Bovine Viral Diarrhoea (BVD) (Bovilis BVD):

- Initial Course: Two doses 4 weeks apart. Complete 4 weeks before service.
- Booster: Annually, prior to breeding.

3. Blackleg (Covexin 10):

- Initial Course: Two doses 6 weeks apart in spring.
- Booster: Annually in autumn.

Ensure all vaccines are stored in the dispensary refrigerator at 2 to 8 degrees Celsius. Do not freeze.
